PROFILE

Always ready to prove myself through my work and responsibility. I have 2 years+ experience in Web Development field and have prior knowledge in Quality Assurance and testing. I also have analytical skills, detailed knowledge of application functions, bug fixing, testing protocols, and strong attention to detail. I am comfortable learning any new technologies if needed. To establish myself as an outstanding performer, discovering something new every single day is one of my favorite parts of being a high-level programmer.

SKILLS

Comfortable:

React JS, Redux, Redux-toolkit, RTK query, Express JS, Node JS, MongoDB, Firebase Authentication, TypeScript, JavaScript, HTML5, CSS3, Bootstrap and Rest API.

Familiar:

Tailwind, Jest, React Testing Library, and Microsoft SQL Server

Tools:

Github, Git, VS Code, Chrome Dev tool, Atom, Heroku and Netlify.

PROJECTS

GamersZone – Games Website

[LIVE](#) || [CODE](#)

- React component based design to give users more fluent experience and also responsive for mobile devices.
- Data is fetched From a popular API(Rawg) using RTK query.
- Structured and clean code
- Users can see all the latest games and their information.
- Users can filter games by their genres.
- All Games data and Creators Data are paginated so that we get smooth user experience.

- Animation is used so that users get engaged with the website.

Technologies used: React Component, React Router, TypeScript, Redux, RTK query, react-bootstrap, Rest API and more.

Chrono Dial - Watch Store

[LIVE](#) || [CLIENT CODE](#) || [SERVER CODE](#)

- A MERN stack project that has all the features a watch store needs.
- Login and register functionality implemented with firebase.
- Admin and user dashboard. Both have separate functionality and secured by private route.
- Admin can access all dashboard functionality such as make Admin, add a new watch to the collection, manage all orders and manage products. But the users are limited to managing their orders only and adding a review function.
- 404 page is created so that users cannot pass restricted parameters.

Technologies used: React Functional Component, React Router, Rest API, Custom hooks, ES6, react-bootstrap, and more.

You can find more of my latest projects and works in my Github profile:
